

Jonas V

27

REGION

Aalst - Ghent - Brussels - On remote

PROFILE

Jonas is the example of an intelligent young potential. Jonas has a first professional experience as a software engineer and is eager to further develop his wide technical skillset. Jonas is a full stack engineer with a preference in backend. With his analytical mindset he likes to develop functional software. In his spare time he likes to develop personal projects and modifications for games. He also spends a lot of time to learn more of his well-known coding languages.
