### REGION

Ghent - Antwerp - Brussels

PROFILE

Hi,

I'm Sean, a young developer who's very eager to show my skillset in a team of professional colleagues. During my studies, I've obtained a solid base in Object-Oriented-Programming in general and gained experience .Net/C# development. I think I can say I have the ability to learn fast and pick up things quickly, but of course I'd like to prove this mindset in a challenging job.

Developer profile: Back-End
