

Dylan T.  
25 Years Old

## REGION

Limburg - Kempen - On Remote

## PROFILE

Hello,

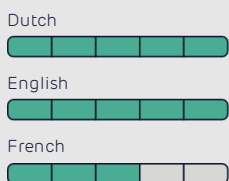

My name is Dylan, a passionate & responsible developer with a critical mindset. Through my strong interest & talent for IT, I successfully received my degree in Applied Informatics. This offers me a valuable opportunity to efficiently dissect & analyze complex matters to figure out to-the-point solutions. In my spare time, I also like to compete in development-challenges.

I'm a full-stack developer with a preference for back-end. My core skills are .Net/C# & Java.

### PXL Hogeschool

**Educational Project**  
**Study Progress Tool**

Study Progress Tool

Description: A project at PXL University of Applied Sciences that consists of two parts. On the one hand there is a web application written in Angular with a Java backend, and on the other hand a mobile application written with Xamarin.Forms and a .NET backend. These include DDD, Docker, Entity Framework, microservices, MVVM, and RabbitMQ.

Technologies: Java, C#, Xamarin.Forms, Docker, Entity Framework, MySQL, RabbitMQ

### Dovetail BV

**Internship**  
**Software Developer**

Description: Dovetail BV manages an application of the same name, Dovetail, with which integrations between applications can be configured and managed. During this project, I converted the data flowing through Dovetail into useful data and graphs, and then showed this on a dashboard.

Technologies: Java, Spring Boot, HTML, CSS, JavaScript, Elasticsearch
