

Wout M
25 years old

REGION

Antwerp - Kempen - Brussels - On Remote

PROFILE

Hi,

I'm Wout, an young, ambitious man with a very strong learning ability and a Bachelor in Computer Science. I cherish the ambition to build a stable, professional career as a software developer.

Since childhood, I've always showed a lot of interest and talent for ICT, which has also translated into my academic track, namely my Computer Science studies at KU Leuven and a leisure activity dominated by IT.

Description:

- As a Java Software Developer (Maven/IntelliJ), I'm involved in a large-scale project (UBench). UBench is an application focusing on the administrative processing of leasing contracts. These leasing customers not only include cars, but also other means of transport like bikes.
- The following aspects are included in this process:
 - Registration of accidents and damage;
 - The selection of repairman;
 - The selection of damage expert;
 - Analysis of insurance documents;
- Next to the development of the application in Java, I also have the responsibility to automate the software testing (Selenium).

Technology: Java, Maven, IntelliJ, Selenium.
