Joren V
27

REGION

Bruges - Roeselare - Kortrijk - On Remote

PROFILE

Hi,

My name is Joren, full stack developer with a preference in Java development in which I already built up professional experience during some projects.

I'm committed to write clean & robust code on which my collegues can build further when needed. I execute my tasks with a strong focus and I like to dive into the subject to find the best suited solution. I also know that development is more then just writing code. I always like to add some decent testing to the written software.

PERSONAL SKILLS

- ✓ DETAIL ORIENTED
- ✓ HIGH LEARNING ABILITY
- ✓ ORGANIZED
- ✓ OUT-OF-THE-BOX THINKER
