

Yarno A.
21 years old

REGION

Brussels - Leuven - Antwerp - On Remote

PROFILE

Hello,

My name is Yarno. I consider myself to be a motivated and organized person with a strong problem-solving mentality. I am a full-stack developer with a preference for Python. Furthermore, I can also be deployed as Test-Automation-Engineer. My passion for development is strongly reflected in the way I spend my leisure time. I like to keep my skills up-to-date in order to use these efficiently in my day-to-day activities.

CoderDojo

CoderDojo

Volunteering Work
Teacher/Coach

CoderDojo is a global volunteer-led community of free programming workshops for young people. I joined this organization back in 2013 where I learned my first programming skills. From the start of 2017 I was asked to become teacher which I did until 2020. In this role, I educated young children to build something in Scratch and other programming languages such as Python.
