## PROJECT HISTORY

---

10.2022 - 09.2023

Consultant  
Software Developer  
**Coteng**

---

Coteng

**Consultant**  
**Software Developer**

Description: During my employment at Coteng, my job was a combination of setting up new back-end services to manage and process a queue of inbound requests for one of their applications, as well as developing many smaller functionalities for many pre-existing tools across Coteng's portfolio. This ranged from adding data-transfer commands to certain file pools to fixing bugs and integrating new services in their main sites. These technologies were built in a combination of C#/.Net, JS, and React.

Technologies: C#/.Net, JS, and React, Visual Studio, ReSharper, VS Code, Sourcetree, Gitlab, Jira, Teams

---

## PROFESSIONAL BACKGROUND

---

12.2021 - 08.2022

Employee  
Software Developer  
**Classid**

---

Classid

**Employee**  
**Software Developer**
