

Dorssen D

21 years old

REGION

Hasselt - Brussels - On Remote

PROFILE

Hi,

I'm Dorssen, a young developer who's very eager to show my skillset in a team of professional colleagues. During my studies, I've obtained a solid base in C++ & C# development. I think I can say I have the ability to learn fast and pick up things quickly, but of course I'd like to prove these assets in a challenging job.

Furthermore, I already lived in various places around the world. This gave me an open-minded attitude and independence.

Developer profile: Back-end
