PROFILE

Hi,

I'm Ruben, a software developer who is strongly focused on the continuous improvement of my knowledge and skills.
This attitude is clearly evident in my leisure activities, stuffed with IT-related challenges like website -, application -and game development. Combined with my various professional experiences, this makes me a versatile profile with an up-to-date knowledge.
Developer profile: **Full stack**

My **portfolio**: www.rubenlabruyere.be

METHODOLOGIES

OOP	Agile, Scrum
Design Patterns	DevOps
MVC	

06.2022 - 11.2023
Consultant
Software Engineer
Aginco NV

04.2021 - 06.2022
TRplus consultant
Vlaams Departement voor Landbouw & Visserij
Departement Landbouw & Visserij

Aginco NV
Consultant
Software Engineer

Aginco is the software supplier of RegSol and JustRestart. These are two .NET web applications that both Justice authorities and citizens are legally required to use for managing both business and personal bankruptcies. The goal of RegSol and JustRestart is to handle and process bankruptcy, reorganization, and transfer files, as well as promote communication among the registry office, trustees, creditors, debtors, and various other legal stakeholders.

I primarily worked on the maintenance and development of new features for both RegSol and JustRestart. Additionally, from time to time, I was involved in setting up and maintaining the CI/CD environment within Azure DevOps. Furthermore, I had the opportunity to set up and migrate several REST APIs.

Technologies: .NET Framework, .NET 6, Entity Framework, MVC, ASP.NET, jQuery, DataTables, JS, MS SQL server, Docker, NuGet, Azure DevOps pipelines

Departement Landbouw & Visserij
TRplus consultant
Vlaams Departement voor Landbouw & Visserij

Description:

- Working as a full stack engineer in the context of a webapplication for the budget management for professional farmers and umbrella organizations.
- As a team member, I'm responsible for the maintenance and production of GMO.

Technologies:

- Angular, AngularJS, Kendo, AG Grid, Oracle SQL, .NET, ASP.NET, WCF Services, Team Foundation Server, Git, Karma/Jasmine.

PROFESSIONAL BACKGROUND

04.2019 - 04.2020
Employee
DevOps Engineer
Dover Fueling Solutions

04.2018 - 07.2018
Employee
Junior Web & Cloud Developer
Trivec Systems

02.2017 - 03.2018
Employee
Junior .Net Developer
XXimo

Dover Fueling Solutions
Employee
DevOps Engineer

Description:

- As a DevOps Engineer, I was responsible for the maintenance and support of various development tools such as TeamCity, Bitbucket and Artifactory. Here I've gained a lot of experience with Azure.
- I also developed command line tools and web applications to facilitate the work of engineers all over the world dispersed. In addition to maintaining these tools, I supported and trained engineers on how to use it.
- In the context of the command line tools, I had to design several API client applications to communicate with global APIs from Atlassian, JFrog & TeamCity.
- In the context of CI CD, I had to implement webhooks for automatic building in TeamCity.
- For the control and check-up of JIRA time sheets, I created an ASP.Net application that communicated with the JIRA API to validate time sheets and send out email notifications to users who didn't fill in their time sheets on time. This application was hosted on an Azure Ubuntu server VM which authenticated with the Azure Active Directory.

Technology: TeamCity, Bitbucket, Artifactory, Azure, GIT, REST API, C++, Java, Python, Jira, Windows Server, Ubuntu Server, Docker, NodeJS, Angular, AD, .NET & ASP.NET.

Trivec Systems
Employee
Junior Web & Cloud Developer

Description:

- Development of a portal for the customers of Trivec. Besides programming, I was also responsible for a large part of design and partly responsible for the Azure environment on which the website was hosted.
- The front-end of the website was developed in Angular and the back-end was a ASP.Net core REST API application.
- Alongside HTTP endpoints, I also implented an OAuth2 security system for user authentication.

Technology: .Net, Angular, ASP.Net, Azure web services, OAuth2 & GIT.

XXimo
Employee
Junior .Net Developer

Description:

- I have collaborated on major projects, maintained an admin panel for the company itself and for large companies that also used it. Email design, set up of a server environment and he collaborated with other companies to automate and optimize certain key processes.
- I also maintained a REST API to communicate with XXimo's Android & IOS application.

Technology: .Net, WCF, WebAPI, ASP.Net & Team Foundation Server.
